

CONSTRUCTION NOTICE

Kalamazoo Street Reconstruction - Phase IV

Construction crews are scheduled to begin the roadway and utility reconstruction in your area during:

Week of September 26, 2016

This week, the city received notification from Milbocker & Sons, Inc. that they intend to begin the Kalamazoo Street Phase 4 reconstruction project next week. The work is intended to start with pulverizing of the asphalt between Lovejoy Av and Aylworth Av on Wednesday, September 28. Milbocker will then commence installation of new sanitary sewer and water main south of the Aylworth Av intersection during the week of October 3.

Access to local traffic will be maintained using maintenance gravel. Due to the ongoing Phase 3 project, access will only be provided from Kalamazoo Street, south of Lovejoy. Kalamazoo Street through traffic will be detoured on Lovejoy Av, Monroe Blvd, and Elkenburg St around the Phase 3 and Phase 4 construction limits. Sanitary sewer construction on Phase 3 is anticipated to be completed by September 23. Kalin Construction will then begin installation of storm sewer, followed by roadway restoration.

City Staff will notify residents with door hangers as construction progresses and when construction activities may cause utility interruptions or limit access to/from property. The City of South Haven will be working closely with the Construction crews to minimize your inconvenience.

Detour Routes are Shown on the back of this document.
Weekly progress updates will be published online at:
